

MODULAR APARTMENT

In this project we were tasked with creating a modular unit, and once that was created, we had to develop a modular apartment complex. The idea was to see how each modular unit would connect to each other

The concept was based off the idea of getting to know your neighbour and trying to create gathering spaces. Why Octagon shape? the number 8 biblically means new beginnings, so, new friendships can be created

PROGRESS

gathering spaces
for units.

bridge
→ connecting other units
together
